

OnMission Volunteer Role Descriptions

Refugee Settlement Team:

If you are interested in helping to settle refugee families then this is a great team to be part of! As a church we are sponsoring a family of three from Pakistan who would need help securing housing, furniture, registering for school English classes, and finding employment. As part of this team, you would work behind the scenes to coordinate the needs for this family and ensure their transition to the GTA is supported. This is a year long project and may have some delays. Most of the work is done behind the scenes.

Community Engagement Coordinator:

The Community Engagement Coordinator will assist in leading our OnMission local projects by organizing the administrative details for each project and continue to build and maintain relationships with those who are community partners of the bridge. If you are passionate about mission and love to connect and build relationships this is a great role for you! Experience in building community partnerships would be a great asset.
